📍 F402, Shubhashree Residential, Phase II, Near Jai Ganesh Vision, Akurdi Pune, Maharashtra (411035)

SKILLS/TOOLS :

- **Languages/Methodologies -** C#.NET,VB.NET, VB, C#, JavaScript, , T-SQL
- **Web Technologies -** Asp.Net, HTML, C#.NET,ASP, IOT-Thingworx
- **Database -** SQL(00/05/08/12), GraphDB,Marklogic,SqlLite, PostgreSQL, Oracle
- **Tools -** Visual Studio.Net 2005/2008/2010,IIS 6.0/7.0
- **FrontEnd Technologies -** AngularJS,Javascript, CSS,JQuery, VB Script, HTML, DHTML
- **Operating Systems -** Win 95/98, Win 2000, Win 2003/2008 / XP / Professional

■ PROFESSIONAL SUMMARY

- Overall 20+ yrs of total experience in IT industry.
- Having **11+ yrs of relevant experience** in ASP.NET, .Net Framework (2.0/3.5/4.0) – C#.Net, VB.Net, SQL 2005/ 08/ 12., Has profound knowledge of Asp.Net MVC, WPF and AngularJs, Has profound knowledge in IOT platforms – ThingWorx (4+yrs).
- Has sound knowledge of Application Design and Database design., Full project life-cycle experience encompassing analysis, design, coding and implementation of systems (SDLC).
- Has sound knowledge of MOSS 2007/ SharePoint 2010., Has efficiently lead team of 8-10 members., Hands-on experience as a developer and lead designer/architect on various systems., Have successfully designed and developed applications in ASP.NET with C#/VB.NET like ERP, Inventory, CRM, Online Reservation Booking System and Logistics (Post Invoicing Tracking System), Revenue Tracker, Human Resource Management System., Designed highly scalable system architectures that accommodate future growth, minimize risk, and optimize long-term investment in IT infrastructure.
- Create and managed software architecture documents, developed technical specifications for various Enterprise., Has ability to prioritize, manage and execute on multiple tasks simultaneously., Has profound knowledge of JIRA Tool(2 yrs)

📝 EDUCATION

- **B.E Computer from PICT**, Pune University (1993-1999)

🏅 KEY ACHIEVEMENTS/ REWARDS

- KUDOS for timely deliverables of Project & Good Support.
- Appreciation Letter & Cash Prize of 50K from CEO (Geometric), for excellent performance during the Financial Year Apr 2009-Mar. 2010

🛂 PASSPORT DETAILS

- **Passport Number** : L9335173
- **Validity** : 08/05/2014 to 07/05/2024

💼 PROFESSIONAL EXPERIENCE

STL Digital (June 2022 to Present)
Designation: Sr. Technical Lead
ASP.Net Projects:

- **Contract Management & Agreement Contract Creation**
- This project is about maintaining required master data & contract types metadata. Configuring attributes for various contract types/ agreement. Contracts created has to traverse various workflow stages like create, publish, approve/reject etc. There are various reports captured & in Dashboard using widgets they are displayed.

HCL (October 2008 to Present)
Designation: Technical Lead
1) Smart Tool Application:

- This project is linking IOT features with smart watch & displaying UI like drawings & various features relevant for project. Extracting data in excel & displaying the same

IOT Projects:
1) AGV Connector:

- Simulating AGV APIs using Opc client. Used to transport old & new tools from robot to Tool calibration center. AGV was having APIs to get & place order so as to decrease the lag time.

2) DOE(Dynamic Operating Environments)

- **Project Title** - DOE(Dynamic Operating Environments)
- **Project Type** - Development, Designing, Implementation, Evaluation, Maintenance, migration
- **Primary Skills -** IOT- ThingWorx 6.5/8.0, GraphDB, Marklogic
- **Sub Skills** - Javascript
- **Platform** - Windows, IOT, TomCat
- **Software** - IOT
- **Project description** - DOE has various interfaces for various modules like Operator

Product/ Process Oriented, Logistician – tracking of missing parts in a particular work order & mapping it with a tag indicating availability of parts to be consumed for various operations like fixation, installation etc. Chart features are also some added functionalities like pie chart, donut chart, Gantt chart, google Gantt chart wherein variation between baseline & actual data can be visualized. Various report features are provided for example virtual cockpit where the shop floor map is displayed and the manager can track a detailed overall activities like operator attendance data, aircrafts assembled data , pending for assembly in various plants, quality test results.

- **Responsibilities** - Coding, development of various features, unit testing, implementation & deployment. Development of required extensions. Interact with the client to create technology specifications from business requirements for modules within the project.

JIRA Projects:
- **Project Title -** JIRA Project & Confluence
- **Project Type -** Development, Designing, Implementation, Evaluation, Maintenance, migration
- **Responsibilities -** Coding, development, unit testing, implementation & deployment. Operation Support. Interact with the Client for business requirements

As an Individual Contributor my project experience includes:
- **Project Title -** Revenue Tracker System
- **Project Type -** Analysis, Development, Design, Implementation, Maintenance, Integration,
- **Primary Skills -** ASP/ASP.Net, SQL, HTML, Javascript
- **Sub Skills -** VBScript
- **Platform -** Windows, IIS 6.0
- **Software -** Microsoft
- **Project Description -** This project is supposed to have the utility of generation of comparative and analytical reports, required by various modules and programs. It is designed in such a way that it will have exhaustive data records for the organization bifurcated at various levels (organizational hierarchy). It is a tool which will depict the organizational Revenue Accrued, Revenue Projected & Revenue Possible to be acquired. It is designed to track the revenue & provides the ability to streamline the revenue management cycle & enhances revenueopportunities at an organizational level. It is designed to analyze the incoming & outgoing revenue, identify variances related to budget, estimated & actual
- **Responsibilities** - Designing & executing test plans and gap analysis to ensure that business requirements and functional

Various .Net Projects Handled are as follows:
- **Project Title -** Attendance Regularization System, Pre joining Portal, PCMS (performance System), International/Domestic Travel System
- **Project Type -** Analysis, Development, Design, Implementation, Maintenance, Integration,
- **Primary Skills -** ASP.Net, SQL, HTML, Javascript
- **Sub Skills -** VBScript
- **Platform -** Windows, IIS 6.0
- **Software -** Microsoft
- **Responsibilities -** Designing & executing test plans and gap analysis to ensure that business requirements and functional specifications are tested and fulfilled. Coding, Development of various features, creating various functionalities, Testing Implementation Interact with the client to create technology specifications from business requirements for modules within the project. Responsible for defining, documenting and articulating functional scope. Also involved in technical analytical, problem-solving and identifying, analyzing, tracking and managing customer and application data flow issues throughout a software system Planning and allocating work to the team. Analyze and define interfaces, design classes and design subsystems Managing, mentoring & providing technical guidance / support to Project Teams

Compulink Systems Ltd. (Nov'2006 – Oct' 2008)
Designation: Project Lead
- Worked for their product PMP (owned by CSL), responsibilities which includes development, team handling,task delegation, handling client interaction, development, issue resolution, integration,coordination, maintenance, deployment & implementation.

Midriff Technologies Ltd. (Nov' 2004 – Nov' 2006)
Designation: Project Lead
- As a Project Lead have done development for product PMP (owned by CSL), as well as other responsibilities which includes task delegation, handling client interaction, development, integration coordination & maintenance, deployment & implementation and coordinating and the management of releases across the enterprise for multiple applications in Client project

Abweb /Infotech Pvt. Ltd. (Nov'2000 – Nov'2004)
Designation: System Analyst/Software developer
- Developed Various systems for clients, including application design, database design, deployment, implementation.
- Prepared Technical Specifications (Low Level Designing) for the projects, Primary responsibilities include analysis of requirements, finalize system requirements specifications with client Business Analysts and develop the POC for those SRS
- Key responsibilities were writing the functional specification, designing the architecture, writing essentially all of the software and meeting schedule requirements for this user interface, Contributed to create the company strategies at every stage.
- Implemented end to end solution for the project., Examined industry best practices and incorporated into projects., Unit Testing and reviews
